- 2019 ~ 2023 Gregory University Uturu (undergraduate)
- B.Sc in Computer Science

Portfolio

road map web application

[link to live website](#)

- Built a web application that allows users select a road map, see the topics they need to know, makes resources available for each topics, take a test for assessment and see their scores.
- Stores users data using local storage, remembers where user read topics and test score.
- Ensures users do not skip a topic they should know before and jump to the next one without passing the test

Find that country web application

[link to live website](#)

- Built a web application that display different countries, allows the users see more detail about a country
- Filter displayed countries depending on their continent
- Search for different countries according to their name
